Summary

Digital platform and web operations professional with 10 years of experience driving performance optimization, e-commerce solutions, and cross-functional digital initiatives. Expertise in WordPress, WooCommerce, Shopify Liquid, API integrations, and automation, with a proven track record of enhancing user experiences and operational efficiency. Adept at leading distributed teams, managing complex projects, and delivering scalable solutions for multi-site ecosystems and SaaS platforms. Skilled in leveraging analytics, QA, and agile workflows to reduce risk, boost conversions, and support business growth.

Work Experience

Web Platform & Digital Operations Consultant

Oct 2025 – Present

• Orlando, FL

Providing ongoing consulting services to U.S.-based organizations across web platforms, e-commerce, automation, and digital operations.

Selected Clients

- **201 Digital Group**
- Direct technical delivery and governance for PHIL, a multi-tenant AI SaaS platform, managing GitHub, AWS, access controls, and n8n automation.
- Lead frontend engineering for PHIL Admin and AI chat, building modular WordPress/Bricks and JavaScript interfaces integrated with FastAPI through WordPress REST and the custom PHIL Bridge plugin.
- Reduce integration risk by validating backend APIs through Swagger and conducting end-to-end QA before frontend integration.
- Support additional agency-managed WordPress platforms, resolving production and security issues, integrations, and evolving functionality needs.
- **NF Sports**
- Develop custom Shopify Liquid features, responsive landing pages, and reusable storefront sections supporting marketing and e-commerce initiatives.
- Improve product discovery through navigation, predictive search, and subscription-flow optimization.
- Reduce release risk through cross-browser and mobile QA while managing storefront updates, promotions, and third-party integrations.

Web Platform Manager

Jan 2021 – Jul 2025

USA Tile and Marble • Miami, FL

- Owned and optimized a multi-site WordPress/WooCommerce ecosystem supporting multiple brands with shared inventory across online and physical channels.
- Designed and implemented custom PHP and WooCommerce solutions for pricing, cart, checkout, and dynamic purchasing workflows.
- Built scalable product data architecture using Advanced Custom Fields (ACF) and a centralized "Rosetta Stone" system to manage product information, pricing, and SEO metadata across multiple websites.
- Managed GA4, Google Ads, Search Console, Merchant Center, and Hotjar to support analytics, conversion tracking, campaign performance, and UX optimization.
- Improved website performance, Core Web Vitals, and media delivery through continuous optimization and SpeedSize implementation.

- Drove website optimization initiatives focused on user journeys, navigation, conversion improvements, and overall digital experience.

WordPress Lead Developer
Jan 2013 – Dec 2020

Chicago Code Monkeys • Chicago, IL

- Led a distributed developer team across South America, delivering concurrent WordPress and WooCommerce projects.
- Translated client requirements into implementation plans and coordinated delivery through Jira and Agile workflows.
- Resolved production issues across client platforms, supporting reliable launches and ongoing operations.
- Built CRM and form integrations connecting customer-facing experiences with business workflows.
