PROFESSIONAL SUMMARY

Digital platform specialist with 10+ years of experience owning and optimizing WordPress and WooCommerce ecosystems to support performance, SEO, and business growth. Strong background in backend customization (PHP), technical SEO, analytics integration, and automation workflows. Proven ability to improve user experience, streamline operations, and support revenue-driven marketing initiatives through scalable web solutions.

PROFESSIONAL EXPERIENCE

Independent Digital Platform Consultant (WordPress & WooCommerce)
Clients: 201 Digital Group, NF Sports, Fear The Lamb Apparel — Oct 2025 – Present

- Own and optimize WordPress platforms using modern builders (Bricks, Elementor), focusing on performance, responsiveness, and Core Web Vitals.
- Maintain and troubleshoot multiple WordPress environments, resolving plugin conflicts, performance issues, and platform integrations.
- Developed a custom WordPress plugin powering a conversational AI chat interface (ChatGPT/Gemini-inspired), connecting frontend user queries with n8n automation workflows and restricting access to subscribed users via MemberPress.
- Manage subscription-based platforms using MemberPress, including billing workflows, user lifecycle management, and content access control.
- Optimize Shopify storefronts using Liquid, implementing dynamic content systems and improving navigation, product discovery, and overall user experience.

Web Platform Manager (Remote)
USA Tile & Marble | Miami, FL — Jan 2021- Jul 2025

Leading importer of high-end porcelain and marble tiles with a multi-brand e-commerce ecosystem.

- Owned and optimized a multi-site WordPress/WooCommerce ecosystem supporting multiple brands with shared inventory across online and physical channels.
- Designed and implemented a custom PHP-based pricing system to handle square-foot calculations, ensuring accurate pricing across product, cart, checkout, and order confirmation flows
- Customized WooCommerce templates and logic (cart, checkout, functions) to maintain data consistency and enable dynamic quantity updates throughout the purchase journey.
- Leveraged Advanced Custom Fields (ACF) to structure and manage complex product data, enabling scalable customization across product pages, cart, and checkout.
- Designed a centralized product data system ("Rosetta Stone") to manage product information, pricing, and SEO metadata across multiple websites sharing a single warehouse.
- Managed integrations with Google Analytics, Google Ads, Search Console, and Merchant Center, including feed optimization and issue resolution.
- Improved site performance and Core Web Vitals through continuous optimization and media delivery improvements (Speedsize).
- Analyzed user behavior using analytics and heatmap tools (Hotjar) to identify opportunities for UX and conversion improvements.
- Supported improvements in user journey and purchase flow through backend and UX optimizations across the WooCommerce platform.

WordPress Lead Developer (Remote)
Chicago Code Monkeys | Chicago, IL Jan 2013 - Dec 2022

Software development agency specializing in custom solutions and Agile methodologies for diverse clients.

- Led development and maintenance of WordPress and WooCommerce websites across multiple client projects.
- Developed custom functionality using PHP, HTML, and CSS to support business requirements.
- Managed a distributed development team and coordinated tasks using Jira and Agile workflows.
- Acted as the primary technical liaison between clients and development teams.

PROJECTS

Modern Portfolio & CI/CD Platform (Next.js) | johnreyna.tech
Next.js 15, TypeScript, Tailwind, Vercel

- Built a high-performance web platform using Next.js with a fully automated CI/CD pipeline (GitHub → Vercel).
- Designed a case-study driven architecture to showcase real-world engineering solutions and measurable business impact.
- Optimized Core Web Vitals and performance, achieving near-instant load times and serverless scalability.
- Implemented a modern UI/UX with structured project storytelling (Problem → Solution → Result).
